Procedural Rules

- The system will operate by selecting a group.
- There are 10 age group for men, with 10 bodyweight categories each; and
- There are 8 age groups for women with 10 bodyweight categories each.
- For example, the first group selected for men will be M35 and bodyweight category 55kg, and the first group for women will be W35 and bodyweight category 45kg.

- Any group with less than 5 lifters registered will result in all being selected and the next group will be selected (i.e. M35/-61kg or W35/-49kg, respectively).
- If a group has more than 5 lifters from one nation registered, the 5 lifters with the “best totals” registered will be selected and the remaining lifters highlighted for deselection.
- If the same group now has less than 12 lifters they will all be selected, the next group will then be selected.
- For a group with more than 12 lifters registered, the 12 with the highest “best total” will be selected.
- The remaining lifters in the group will be highlighted for deselection.

The above procedures will be applied to every group.

During these procedures, it will be ensured that sole athletes of one nation will not be excluded from the registration process by systematic application of the above procedural rules.

After the closing date, athletes are still allowed to move up or down a bodyweight category within their age group. It is advised that anyone who does change their bodyweight category is aware of the new 80% rule which has replaced the 15/10kg rule.

Moving up or down a bodyweight category is allowed, although it might result in a group having more than 12 lifters and the possibility of more than 5 lifters from a nation.

If the total selected entry is less than 800 the final procedural rule will be applied.

Where the total registered entry is under 800, the system will examine all groups, men and women, with more than 12 lifters to check the option to allow a deselected entry to be selected.

The 13th ranked lifter will then be selected if he or she is not the 6th lifter from that country to be selected.

This procedure will stop when the registration has reached 800 and when this happens there may still be some deselected registrations.

Please see the following example.

The IWF Masters Committee agree that these procedures are the most equitable method of selecting the best lifters across all nations.

Example for groups where there are more than 12 registered and the total registered is less than 800.
